

SAFETY BULLETIN

Safety Bulletin # 14-3

Summer Vacations

Summer is upon us! Well, at least by the calendar. Hopefully summer weather is soon to follow.

As the season progresses, many of you will be taking time off to enjoy whatever it is you enjoy, be it golf, fishing, quadding, camping...you get the picture.

If the *Hand of Fate* should reach out and touch you while on vacation, and cause you some sort of bodily injury, **be sure to tell your supervisor** upon your return to work. We will do our best to accommodate you until you are back to 100%.

Sooooooooo.....while on vacation, take a little bit of your safety training with you. Before you do that heavy lift, think of the hazards, make sure you are properly dressed, and use proper ergonomics. It is fine to **plan** a project while sitting around the fire with your favorite wobbly-pop, but it is advisable to **do** the project when sober and clear headed.

Please remember you are not protected while vacationing, so a serious injury could hurt you both physically and financially.

Have a good summer!
